INTRODUCTION

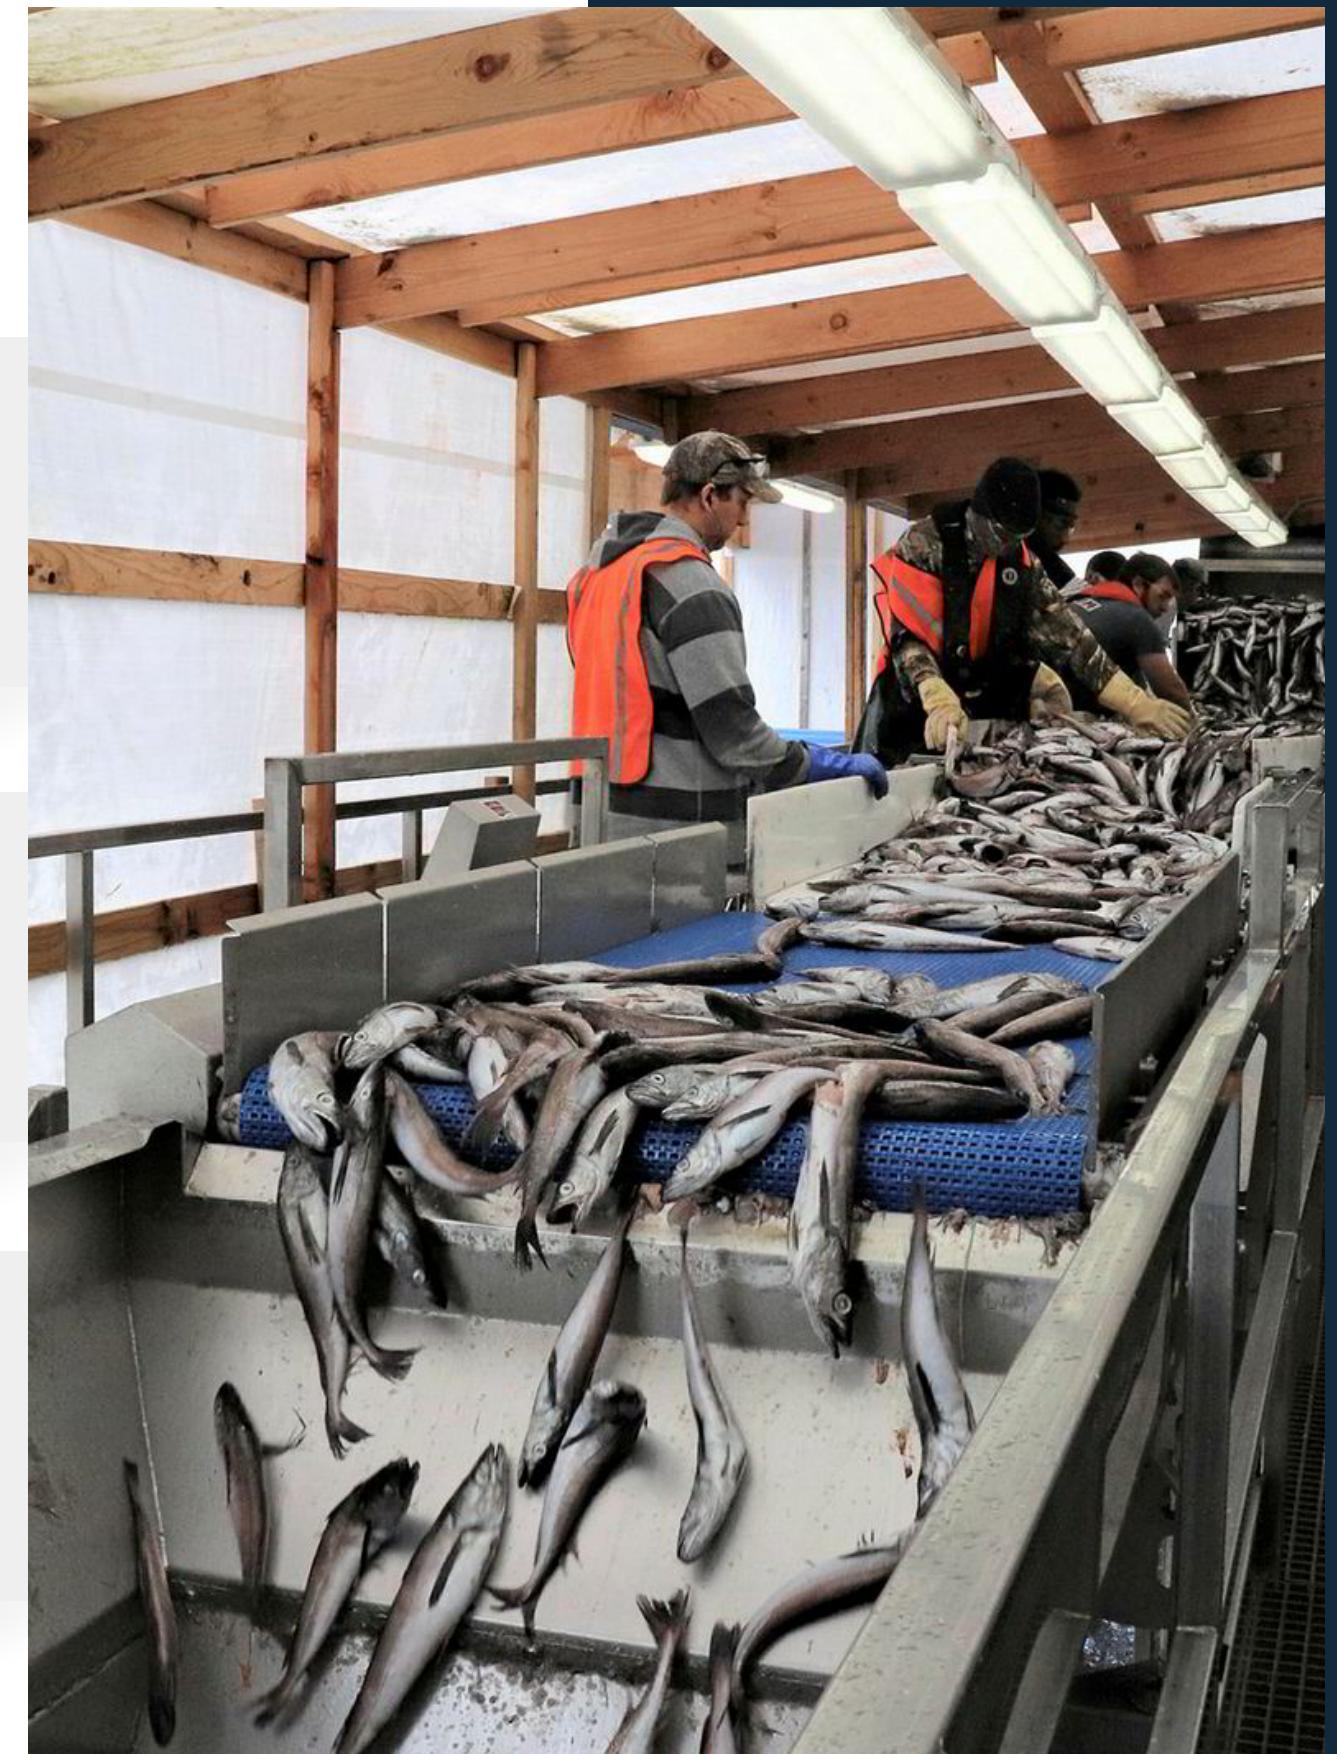

Thousands of pounds of fresh fish, a bustling industry.

Chelem: Witnesses to a seafood operation process.

Manual inventory: An opportunity for improvement.

SeafoodTrace comes into
play

PRODUCT DESCRIPTION

- An automated ***input*** and ***output*** system for perishable product ***inventory control***.
- Incorporating ***RFID*** technology for accurate monitoring and efficient management.

PRODUCT DESCRIPTION

-**Management** of items cataloged in a database, facilitating the confirmation of **entry dates**, product suppliers, designated batches, product species, and exit dates.

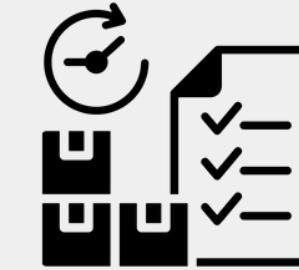

OBJECTIVES

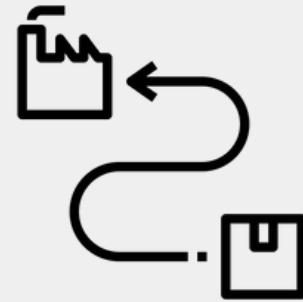

Optimize
inventory
management.

Ensure precise
control.

Minimize
product
losses.

Enhance
traceability.

Achieve time
and cost
savings.

Improve
decision-making
for perishable
products.

VALUE PROPOSITION

Our project's aim is to ***streamline*** operations for exporters of perishable products, with a specific focus on food ***freezer management***.

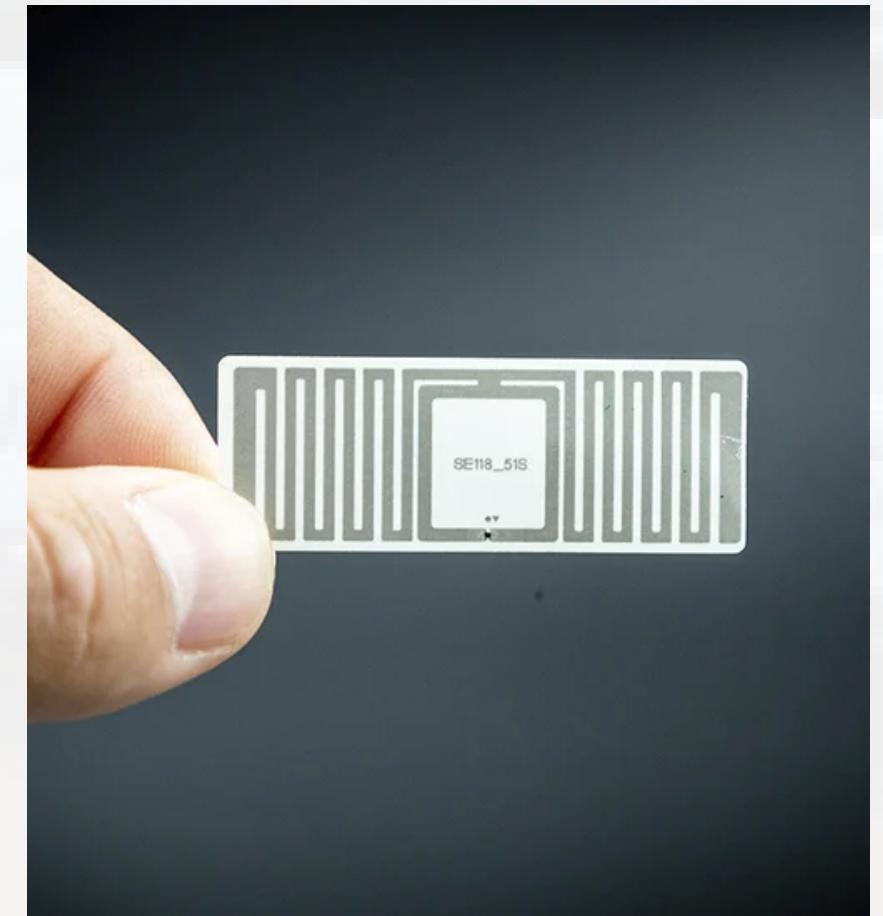

VALUE PROPOSITION

Unique feature: *RFID* integration

-Reduced workload.

-Higher profits.

-Less waste.

IN CONCLUSION

Our automated system transforms inventory management with real-time accuracy and reducing errors.

This project boosts productivity and profits. We're excited to collaborate and improve your inventory management.

THANK
YOU
